

CBMW Express Bridgesaver Mixer

Your Partners in Quality.

CBMW Mixers
Continental Mfg.

The CBMW Express Bridgesaver mixer is specially designed for weight sensitive areas, using a hydraulically driven extra axle to achieve elongated weight distribution. The CBMW Express Bridgesaver is specially designed to provide enhanced safety features, such as lower booster hydraulic pressure, enhanced ride stability, exceptionally strong Box I-beam extra axle arms, low center of gravity, and advanced design extra axle stop system.

This unit is also newly designed to afford ultra high-speed charge, mix and discharge times, even for zero slump material. Additionally, it includes long wearing, easily maintained double tapered roller extra arm bearings. Enhanced durability, derived from high strength material, and superior mixer component design make the Express Bridgesaver a value-added buy for any fleet. A full array of options cause this machine to fulfill the most demanding requirements found in any construction arena.
